CHAISE-LONGUE
CHAISE-LONGUE

RE_OUT

Divano outdoor a moduli componibili con cui creare divani, poltrone, composizioni angolari anche di grandi dimensioni, pouf, tavolini e chaise longue.

Il **telaio** è realizzato con un tubo quadrato in acciaio inox poi verniciato con trattamento outdoor. L'acciaio inox è un materiale resistente e duraturo, può essere riciclato più volte senza perdere le sue caratteristiche, è quindi un materiale sostenibile.

Il **tessuto** che riveste le imbottiture è un'idromembrana impermeabile con una resistenza alla penetrazione dell'acqua certificata, la parte inferiore dei cuscini di seduta e di schienale e anche dei cuscini decorativi, prevede una rete che consente la fuoriuscita dell'acqua e il passaggio dell'aria all'interno del cuscino.

La **fibra** di poliestere contenuta nelle imbottiture è riciclabile al 100%.
Le **imbottiture** sono prodotte con l'applicazione di una tecnologia che si basa sulla capacità dei materiali utilizzati di drenare rapidamente l'acqua e di consentire un veloce e consistente ricircolo d'aria. In questo modo si evita il precoce deterioramento del prodotto e la comparsa di muffe.

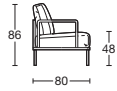

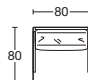

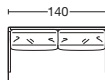

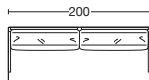

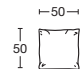

RE_OUT

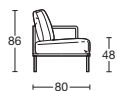

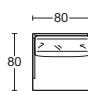

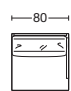

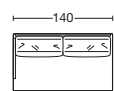

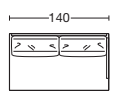

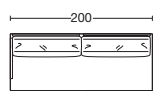

Outdoor sofa with modules that form armchairs, sofas, corner compositions, poufs, coffee tables and chaise longue.

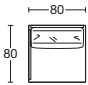

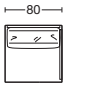

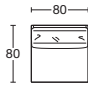

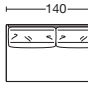

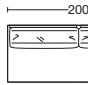

The **frame** is made of a square stainless steel tube then painted with outdoor treatment, stainless steel is a very resistant and sustainable material, It can be recycled several times without losing its characteristics.

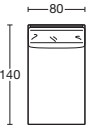

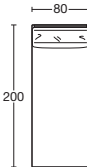

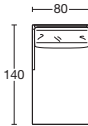

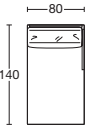

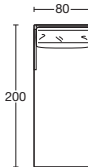

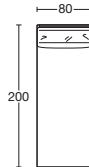

The **fabric** that covers the padding is a waterproof hydromembrane with a certified resistance to water penetration, the lower part of the seat and back cushions and also of the decorative pads, provides a mesh that allows water to escape and air to pass inside the cushion.

The **polyester fiber** contained in the padding is 100% recyclable. The **padding** is produced with the application of a technology that is based on the ability of the materials used to drain water quickly and to allow a fast and consistent recirculation of air. This prevents premature deterioration of the product and the appearance of mold.
